

Cedar3 Technology - Workshop Management System

User Manual & Receptionist Standard Operating Procedures (SOP)

1. System Overview

The **Cedar3 Technology Workshop Management System (v2.6)** is an integrated, real-time web application designed to manage client phone calls, printer intakes, technician workflow, and active shift logging across the entire workshop team.

2. Receptionist Operational Workflow

The Receptionist serves as the primary operational coordinator for incoming hardware, phone calls, and technician dispatching.

+-----+	
	RECEPTIONIST DAILY WORKFLOW
+-----+	
	1. DEVICE INTAKE & TICKET DISPATCH
	- Receive printers or devices at front desk.
	- Click "+ New Job Ticket / Intake" to create client record.
	- Record client phone number, fault notes, and assigned tech.
+-----+	
	2. CALLS & FOLLOW-UP MANAGEMENT
	- Follow up with Talent/Simba on pending repair status.
	- Update "Follow-Up Status" (Client Notified, Needs Call).
+-----+	
	3. HANDS-ON PRINTER REPAIRS & CLOCK-IN
	- Select "Receptionist" profile in Tech Clock-In terminal.
	- Select target printer job (e.g., Epson EcoTank L3150).
	- Log completed repair steps upon clock-out.

3. Step-by-Step Receptionist SOP

Step 1: Receiving Printers & Hardware Drop-offs

1. Click the green **+ New Job Ticket / Intake** button in the header.
2. Enter the **Customer / Client Name** and **Client Phone Number**.

3. Specify the exact printer model and fault description (e.g., *Epson EcoTank L3150 - Paper Jam & Red Light Flashing*).
4. Assign the job to:
 - **Receptionist:** If you are performing the diagnostic or repair yourself.
 - **Talent / Simba:** If assigning to the system or hardware specialists.
5. Set the initial stage to **Pending Intake** and click **Save Job Ticket**.

Step 2: Client Follow-Ups & Technician Coordination

1. Go to the **Active Jobs** tab.
2. Filter by **Receptionist** or use the search bar to find client names or phone numbers.
3. Update ticket follow-up badges as work progresses (*Needs Call Back, Client Notified, Awaiting Parts*).

Step 3: Performing Printer Repairs & Logging Work Hours

1. Go to the **Tech Clock-In** tab.
2. Select **Receptionist (Intake & Printer Tech)** in the staff selection dropdown.
3. Select the printer job ticket from the target job dropdown.
4. Click **Clock In Shift**.
5. When repair or testing is finished:
 - Enter detailed repair notes into the text box (e.g., *Cleared pickup roller obstruction, cleaned printheads, ran 10-page test print*).
 - Click **Clock Out Shift**.

4. Frequently Asked Questions (FAQ)

- **Q: Can the Receptionist see salary details when clocking in?**
 - **A:** No. In **Portal: Technician** mode, all financial valuations remain hidden behind so all team members can share workstation screens with complete privacy.
- **Q: How does the manager see reception and intake activity remotely?**
 - **A:** The manager opens the **Live Dashboard** on their phone or remote PC to monitor incoming job tickets, client follow-up statuses, and active shift tickers in real time.
